

GOVERNMENT SEN. SEC. SCHOOL

THEOG

The school is situated around 35 kilometers from Shimla. The school has two buildings; one for the boys and the other for the girls. The building of the boys' school is around 100 years old. The school is one of the main schools and the only senior secondary school in the area

STUDENTS

The total strength of the school is around 750. The school has classes from 6th to 12th standard. Students come from far off places to attend the classes.

STAFF MEMBERS

The total teaching staff of the school is 29.

Principal: Mrs Usha Singal

WHY WE HAVE SELECTED THIS SCHOOL

Narrow exits along steep valleys and into high-traffic main roads make the school highly risk prone. Cramped classrooms adjacent to fragile staircases and scant exits make it a virtual trap in any emergency situation. Being the only senior secondary school in the locality infrastructure resources are overstretched. Poor maintenance of both structural and non structural components further enhances the risk.

FEEDBACK

PRINCIPAL AND STAFF

The Principal gave us her full cooperation for the three day program. She was happy to know that we were involving the school students and the staff members. But some of the senior students were concerned that their classes might suffer if they participate in the program. But they realized that the programme was necessary as it involved their own safety.
